Back-End: Node.js, Express.js, PostgreSQL

Project Management: GitHub, Trello, Agile/Scrum
Software & Applications: Adobe PhotoShop and Lightroom, Apple Final Cut Pro X, Sketch

WEB DEVELOPMENT PROJECTS

NYC Traffic Ticket Search - *https://nycbike.herokuapp.com/*
An application where users can input a vehicle's license plate number, and returned - if found in records - all the traffic violations in New York City associated with that plate.
- Uses publicly available data API provided for by the city of New York
- Keeps a record of all searches made with the app in a PostgreSQL database for later processing.

Vegan Cookbook Club - *https://vcbc.herokuapp.com/*
A webapp where users can submit sources of their favorite plant-based recipes
- Used React with Redux as the JavaScript framework
- Utilized an external recipe search API and displayed returned data to the front end
- Implemented user authentication
- Users can comment and save their favorite recipes
- Built tools that allows users to scale recipe serving size and calculate shopping cost

Pixr - *https://pixr0.herokuapp.com/*
An image sharing platform where users can post and comment on their photos
- Used PostgreSQL with Sequelize to create databases of users, images, and comments
- Implemented user authentication with password hashing using Passport and Bcrypt to create gated access to user-only privileges
- Created a fully responsive interface that looks and functions well on mobile platforms

RT Movie Search - *http://omdbnycda.herokuapp.com/*
A movie search webapp that uses the OMDB API
- Worked as a part of a group with two other developers
- Personally responsible for the comments functionality of the website, including its deployment to Heroku
